Colour Tinting	Yes	Yes	Yes	No

** Mineral lens colour tinting 12%,25%,50%,75% and 90% (Brown colour only)

We give new life to our patients

Patients may experience numerous problems with progressive lenses:

reading areas are too narrow; too much distortion from the sides, takes long time to adapt to progressive lenses and... But with SWISSCOAT ECO progressive lenses they will experience:

- Flat aspheric design of optimized cosmetics and comfort
- Distortion Free
- Asymmetric optical design provides for a long distance vision zone with reduced distortion level peripherals
- Wide corridor enables comfortable vision in the intermediate distance zone
- The widest reading zone area among of all known progressive lenses
- Algorithm used for developing the lens provides a broad, distortion-free reading zone
- Switching ease - no re-adaptation from standard bifocals or other progressive lenses
- Less visual stress, comfortable and natural vision
- Guaranteed success
