iRoom HD
Office reading glass

- **Order data as general progressive lens by giving Far Vision power and Addition reading power**
- **The degressive power of iRoom will be automatically calculated by iRoom program**
- **The working zone of iRoom – generally within 3 meters from the reading zone**
  (the actual distance of the working zone depends very much on the addition power and result
  of the iRoom program calculation)
- **"+" fitting cross located in between the two progressive engravings**
