

SUNDance™ single vision lens

1.56 photochromic lens is a high quality middle index plastic photochromic lens, light in weight, efficient in darkening and lightening capabilities, performing whatever the weather, whatever the activity. This responsive high performance lens adapts to your lifestyle

SPEED

Lenses for all needs

Ideal for outdoor activities, SWISSCOAT SUNDance™ lenses adjust quickly to all variations of light, even the most extreme. Its ability to darken quickly provides constant visual comfort and reduces the sensation of sudden glare. Becoming as dark as a sunglass when exposed to bright sunlight, SWISSCOAT SUNDance™ lenses also revert to their original colourless state, at home, in the office and in all dimly-lit environments.

RELIABILITY

Lenses you can count on in all situations

At work, at play or on holiday, SWISSCOAT SUNDance™ are multi-purpose lenses that live life at your pace. Wherever you are, in town or in the country, at the mountains or by the seaside, SWISSCOAT SUNDance™ lenses adjust to all situations and are well suited for all your outdoor activities. SWISSCOAT SUNDance™ lenses give you total peace of mind through their long lasting performance, with durability and stability of colour.
