

SWISSCOAT Supreme COAT™

# Supreme COAT™

## Why was Supreme COAT™ developed?

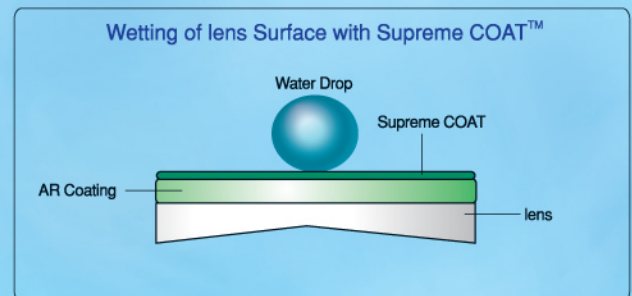

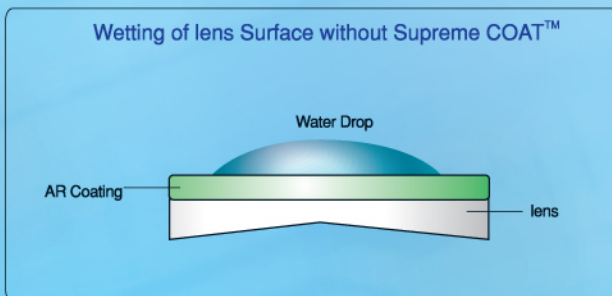

Due to its anti-reflective property, AR Multi coated lens is always alleged that lens cleaning is more difficult than uncoated lens as dirt marks, marks such as fingerprints or water stains are noticeable on coated lens. As a result, Supreme COAT™ was developed by SWISSCOAT to reduce adhesion force from dust and dirt particles to the lens surface which effectively simplifies lens care.

- Smoothing of lens surface to make dirt particle adhere less easily
- Provide better wetting properties to drip water off lens surface which enable easy lens cleaning.

## How Does Supreme Coat Work?

### Water drop testing:

### Oil based marker pen testing:

Better wetting properties

Easy clean on Supreme COAT™
